

# Disks|Encryption|Tools

This page provide you access to additional actions and informations related to the geli based disk encryption.

All you have to do is select a disk and an item from the drop-down list.

Item	Description
<b>attach</b>	Attach an already encrypted disk to the system
<b>detach</b>	Dettach ( remove) an encrypted disk
<b>setkey</b>	Change key ( password) for an encrypted disk
<b>list</b>	List all encrypted disks
<b>status</b>	Show status of encrypted disks <a href="#">geom(8)</a>
<b>backup</b>	Download the Meta data of the disk to you Computer(recommended)
<b>restore</b>	Restore the Meta data in case they are corrupted

As you can see in the screenshot - it is strongly recommended to communicate to your WebUI via https to avoid sending passwords in clear text via your network. see: [WebGUI Protocol and Port](#)
