

Disks|Mount Point|Management

On this page you can manage the Mount Points:

Click on the icon to create a new mount point or on the icon to delete a mount point. With the icon you can edit an existing one.

Disks|Mount Point|Add

On this page you see that we now are going to add a new mount point:

XigmaNAS
The Free Network-Attached Storage Project

System Network Disks Access Services Virtualization Status Diagnostics Tools Help

Disks > Mount Point > Add

Management Tools Fdisk

Settings

Type	Disk
Disk	ada0: 232.88GiB (Samsung SSD 860 EVO 250GB)

Access Restrictions

Owner	root
Group	wheel

Mode	Read	Write	Execute
Owner	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Group	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Others	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Add Cancel

Warning:
You can not mount partition `/dev/ada0p2` where the config file is stored.
UFS and variants are the NATIVE file format for FreeBSD (the underlying OS of XigmaNAS). Attempting to use other file formats such as FAT, FAT32, EXT2, EXT3, EXT4 or NTFS can result in unpredictable results, file corruption and the loss of data!
