

Services|SNMP

Overview of the setup page:

The screenshot shows the XigmaNAS web interface for configuring SNMP. At the top, there is a navigation menu with options: System, Network, Disks, Access, Services, Virtualization, Status, Diagnostics, Tools, and Help. The current page is titled 'Services > SNMP'. The main configuration area is titled 'Simple Network Management Protocol' and includes an 'Enable' checkbox which is checked. Below this, there are several form fields: 'Location' (Server Room), 'Contact' (zoon01), 'Community' (public), 'Traps' (checkbox for 'Enable traps' is unchecked), 'Trap Host' (localhost), 'Trap Port' (162), and 'Trap String' (empty). There is also an 'Additional Parameters' section with a text area and a note: 'These parameters will be added to snmpd.config. Please check the documentation.' Below the main configuration area is a 'Modules' section with checkboxes for 'MibII', 'Netgraph', 'Host resources', and 'UCD-SNMP-MIB', all of which are checked. At the bottom left, there is a 'Save & Restart' button and a note: 'Note: The associated MIB files can be found at /usr/share/snmp/mibs.' The footer of the page contains the copyright information: 'Copyright © 2018 XigmaNAS® <info@xigmanas.com>'.
